

## Instruction Guide for the QTEQ 64 Titanium Diff Cap For the Tamiya F104

High Strength  
Long-Life  
Light Weight  
Optimal Rotational Balance

The QTEQ 64 Titanium Diff Cap For the Tamiya F104 is exclusive to the Tamiya F104.

Apply a very small amount of grease to the rim of an O-ring.  
Install the QTEQ 64 Titanium Diff Cap For the Tamiya F104 to the original diff housing in the same way as the Tamiya original diff cap. Then insert a QTEQ stainless pin to the unit and installation is completed.

The QTEQ 64 Titanium Diff Cap does not use the M3 set screw which is used on the Tamiya original diff cap.

When the QTEQ stainless pin is inserted, there may be some O-ring chipping, but performance of the diff cap will not be affected.

Important:

Please make sure that a wheel is mounted when the drive unit is in operation, ---if not mounted the stainless pin may pop out.
